

## SOLAR PANEL CLEANING SERVICE AND ELECTRICAL INSPECTIONS

### SOLAR PANEL CLEANING SERVICE AND ELECTRICAL INSPECTIONS

Did you know that your solar panels gradually lose efficiency over time?

Factors like dirt, dust, debris, salt, shading, bird droppings, and seasonal changes can reduce your solar panel output by up to 40%, leading to higher energy bills.

At Total Maintenance Solutions (TMS), we offer an environmentally friendly cleaning service along with a comprehensive visual inspection of your solar panels. You'll receive before and after photos, as well as a detailed report on the condition and performance of your system.

All our technicians are fully accredited and experienced in solar panel care.

#### Why choose TMS for professional solar panel cleaning?

- **Efficiency Testing** – Our licensed electricians conduct a thorough system audit and efficiency test to ensure your system is running at its best. You'll receive a full report with recommendations for any improvements.
- **Certified Professional Cleaners** – Cleaning solar panels can be a risky job due to their location. Hiring our experienced technicians ensures the job is done safely and to the highest standards.
- **Electrical Inspections** – TMS can combine solar cleaning with a full electrical inspection and safety check to confirm your system meets current electrical standards.
- **Boost Output and Longevity** – Regular cleaning improves your solar panel's output and extends the lifespan of your system, maximising your investment.

Our licensed, solar-accredited technicians also provide installation services and 24/7 repairs, ensuring your solar system is always in optimal condition.

Contact TMS today for a quote and enjoy peace of mind knowing your solar system is running safely and efficiently.
