

EV CHARGER INSTALLATION FROM TMS

Do you want an EV (electric vehicle) charger at your home or business? TMS offers professional installation and maintenance of EV charging stations. Our qualified team delivers solutions for all vehicles and equipment.

EV Charging Solutions

Electricity Assessment - We evaluate your home's electrical capacity and driving habits to recommend the best EV charging solution.

Installation - Our certified electricians install the right EV charger for your home considering the power compatibility of your vehicle and home.

Upgrades & Maintenance – TMS offers upgrades as needed and maintenance to keep your EV chargers in optimal condition.

Why Choose TMS to Install your EV Charger?

- **Customised solutions** - TMS designs and install EV charging systems to match your energy needs and ensure compatibility with your vehicle and premises.
- **Quality products** - When installing EV chargers, we source materials from trusted manufacturers to ensure the efficiency and optimal performance of your EV in the long run.
- **Experienced** - With over 25 years of experience serving Geelong, the Surf Coast, and the Bellarine, our trusted and qualified local team has the knowledge and skills to deliver top-notch EV installations and maintenance.
- **Customer satisfaction** - We are here every step of the way as you transition to a more energy-efficient future. As a trusted local service provider, TMS guarantees reliable service from initial consultation to post-installation of your system.
- **Comprehensive services** - Our highly skilled professionals can offer expert guidance and assistance in selecting the perfect EV charging systems based on your needs.

Drive your way into a sustainable future today. To learn more about our comprehensive EV charging installations, service and maintenance at TMS, contact (03) 5277 9699 or email admin@totalmaintenance.au.
