

CLEANER, SMARTER ENERGY, FOR HOMES & BUSINESS

OVERVIEW

Total Maintenance Solutions is committed to supporting homeowners and organisations across the Barwon Southwest region in their transition to cleaner, more efficient energy systems. With a dedicated team of CEC-accredited specialists, we design, supply, install and maintain end-to-end renewable energy solutions that reduce energy costs, improve resilience and help meet sustainability and net-zero targets — from civic and commercial systems through to right-sized residential solar and battery.

RENEWABLE ENERGY SERVICES

- **Commercial Solar** — high-performance PV design and installation for civic buildings, sporting complexes, education and industry
- **Residential Solar** — CEC-accredited solar PV systems sized to household consumption for maximum long-term savings
- **Battery Storage Solutions** — advanced storage that supports load-shifting and reliable backup power during outages
- **EV Charging** — supply and installation from residential systems, public chargers, to multi-bay commercial and fleet system
- **Solar Panel Cleaning & Maintenance** — eco-friendly cleaning and inspections with before-and-after reporting
- **System Monitoring** — ongoing monitoring to keep every solar, battery and EV system performing at peak efficiency

Backed by Local Expertise

- **CEC-Accredited Specialists** — engineered installations that integrate seamlessly with existing electrical networks
- **Full Compliance** — every system installed to relevant Australian standards and regulations

WHY CHOOSE TMS

CEC-accredited specialists delivering cleaner, smarter energy that's built to last.

CEC ACCREDITED | END-TO-END SERVICE | LOCALLY OWNED | FULLY COMPLIANT
